

AKASH YADAV

Gurugram, India | +919992585439 | akashyadav20111992@gmail.com

Professional Summary

I have chosen Front-End Web Development because of its creative and ever changing aspect. I would like to work in an organisation where freedom for creativity and learning & doing new things is motivated.

Skills

- Front-End Web Development
 - HTML
 - CSS
 - JavaScript
 - jQuery
 - Critical Rendering Path
 - 60FPS Rendering
 - Knockout
 - Jasmine
 - Bootstrap
-

Projects

- Neighbourhood Map (Udacity)
 - Developed a single page application featuring a map of my neighborhood. I added functionality to this map including highlighted locations, third-party data about those locations and various ways to browse the content.
 - <https://akashyadav20111992.github.io/Neighbourhood-Map-Project/>
 - Website Optimisation (Udacity)
 - Optimized a provided website with a number of optimization and performance-related issues so that it achieves a target PageSpeed score and runs at 60 frames per second.
 - <https://akashyadav20111992.github.io/optimization/>
 - Feed Reader Testing (Udacity)
 - Used Jasmine to write a number of tests against a pre-existing application. These will test the underlying business logic of the application as well as the event handling and DOM manipulation.
